

Call for Sponsorship and Advertising on MIPE2022

MIPE2022

2022 JSME-IIP/ASME-ISPS Joint Conference on
Micromechatronics for Information and Precision Equipment

August 28 to 31, 2022

Nagoya University, Japan (Hybrid event)

<https://www.nagoya-mipe2022.org/>

Sponsors and advertisements are solicited for the **MIPE2022** conference in categories **A** through **E** below.

Please apply from the following URL or send us an email.

Application site: <https://forms.gle/GjLjyrbqk3HBtiDS8>

Contact E-mail : staff@nagoya-mipe2022.org

(If you have any questions, please feel free to contact us by email.)

Sponsorship (A, B)

A	B
¥250,000	¥200,000

MIPE2022

2022 JSME-IIP/ASME-ISPS
Joint International Conference on
Micromechatronics for Information and
Precision Equipment

August 28–31, 2022
Nagoya University, Japan
Hybrid event

About MIPE

MIPE is an international conference co-hosted every three years by the Information, Intelligence and Precision (IIP) Equipments Division of the Japan Society of Mechanical Engineers (JSME) and the Information Storage and Processing Systems (ISPS) Division of the American Society of Mechanical Engineers (ASME). Researchers and engineers in the fields of micro and precision instruments, information storage, intelligent machines, biomedical engineering, tribology, and robotics gather, and the conference has become a place for active technical exchange. While focusing on micro/nanomechatronics and information technology, which are indispensable for high performance and high functionality of machines, the conference also covers technical issues in applied fields, contributing to the promotion of social implementation of technology.

MIPE2022 outline

- Date : 2022/8/28 to 31
- On-site Venue: Nagoya University (Higashiyama Campus)
- Type: Hybrid of real and online (online only, depending on COVID19 situation)
- Expected number of participants: about 300 (including real and online participants)

Keywords for the target field of the conference

Bioengineering, hard disk drives, printable and wearable devices, flexible media handling, machine learning. Intelligent Machines, Robotics, MEMS Sensors and Actuators, Smart Materials, Nano and Micro Tribology, Simulation, IoT Technologies, Smart Maintenance, Energy Harvesting
